

NUTREL

Quality Crop Nutrition

High quality fertilisers and associated products supplied to UK agriculture for over 30 years.

- Comprehensive ranges of single and multi-nutrient formulations
- Products available as easy-mix powders, ready-to-use liquids or suspension concentrates
- Crop specific and specialist nutrients also available
- Custom-blended formulations to meet specific requirements

Products

MaxMan 400

A unique combination of soluble manganese nutrients in a highly concentrated form. Designed to rapidly treat and correct manganese deficiency in all arable crops.

Zinc DP

A finely ground powder for application to the seed tubers of potatoes prior to planting. This method of application carries the zinc to the soil in close proximity to the developing plant.

Fastmix Magnesium Plus

A soluble magnesium and sulphur fertiliser, incorporating a range of micro nutrients in a highly concentrated form designed to rapidly treat and correct deficiencies in all crops.

Accelerator

A foliar growth promoter supplied as an easy-to-use liquid. Accelerator supplies extra vital sugars which are used by the plant to accelerate its metabolic processes.

NutriFast KMan

A formulated blend of inorganic potassium, manganese, nitrogen and sulphur in a liquid form to prevent and cure deficiencies and improving crop quality and health.
