

For powerful weed control in OSR, turn to Belkar.

Belkar® allows you to invest in weed control once your crop has established and weeds are present, so you can better manage those upfront costs.

Belkar is a broad-spectrum herbicide and is highly effective on key weeds such as cleavers, cranesbill, fumitory and shepherd's purse.

Containing Arylex™ active, it has a wide window of application from September through to the end of December, with flexible timing and rate options.

So, this season turn to Belkar as part of your OSR weed control strategy. Talk to your advisor or find out more at corteva.co.uk/belkar
